Mayo Clinic

Ben H. Chew, M.D.
University of British Columbia
SYMPOSIUM OVERVIEW: This course will teach the latest innovative techniques for disease management utilizing the Holmium laser. It will encompass BPH treatments with HoLEP/HoLAP, as well as nephrolithiasis and laser lithotripsy. The format will include lectures, interactive question and answer sessions, expert panels, video review and individual hands-on lab experience.

Some of the special topics are:
- HoLEP/Holap Techniques and Outcomes
- HoLEP Complications
- Laser Physics
- URS Tips and Tricks
- URS Techniques and Outcomes
- HoLEP Surgery

Are you willing to take your patient outcomes to new HIETS?
