COURSE DESCRIPTION
This symposium provides attendees with an update in the diagnosis and management of migraine and other headache disorders. The format will include lectures, expert panel discussions, interactive question and answer sessions, and small-group break-out sessions.

LEARNING OBJECTIVES
Upon conclusion of this program, participants should be able to:

• Review the diagnosis and management of secondary headache disorders, including thunderclap headache and giant cell arteritis.
• Formulate comprehensive treatment plans for primary headache disorders frequently encountered in both the primary care setting and general neurological practice, including episodic and chronic migraine.
• Discuss new and emerging treatments for episodic and chronic migraine, including targeted treatments and noninvasive neuromodulation.
• Apply techniques for the administration of onabotulinumtoxinA and nerve blocks in migraine and other headache disorders.

Attendance at this Mayo Clinic course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.

INTENDED AUDIENCE
All practitioners who evaluate and treat patients with migraine and other headache disorders including internists, family medicine practitioners, emergency medicine, OB/GYN, neurologists and allied health professionals.
