COURSE HIGHLIGHTS

• This conference will give attendees the confidence to accurately diagnose and treat sports-related conditions and the knowledge to determine appropriate testing and referral criteria.

• The course will supplement skills learned in residency and allow participants to fill in gaps in their training.

• Didactics will reinforce existing knowledge of musculoskeletal conditions’ diagnosis and treatment.

• Topics discussed include musculoskeletal conditions and procedural techniques that primary care clinicians can use for athletes and active individuals.

TARGET AUDIENCE

This course is designed for family physicians, internists, sports medicine physicians, ARNPs, PAs, physiatrists, pediatricians, ER physicians, orthopedists and medical providers in a clinic or nonoperative/nonsurgical/noninvasive setting involved in the care and management of athletes and active individuals.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

• Develop a more comprehensive understanding of diagnostic modalities to address sports medicine injuries with the ability to correctly order the test(s) that provide the most useful information at the least cost

• Improve skills in determining an athlete’s ability to return to sports and regular activities after injury

• Determine physical exams and testing appropriate for sports injuries commonly seen in the primary care setting

• Treat sports injuries commonly encountered in the primary care setting, with consideration given to athletes and active individuals and the need for additional expeditious testing or referral to specialists
