## COURSE HIGHLIGHTS

- Teaching practical dermatology to the non-dermatologist
- Interactive lectures covering multiple aspects of dermatology
- Feel comfortable caring for patients with skin conditions
- Expert practicing dermatologists from the three Mayo Clinic national practices
- 5.50 hours of designated of pharmacology content

## TARGET AUDIENCE

The information presented is relevant to a broad range of non-dermatologists and primary care providers, including physician assistants, general practitioners, internists and nurse practitioners.

## LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

- Evaluate a variety of skin lesions, differentiating common and benign lesions from those which require more aggressive management.
- Recognize the need for appropriate sample technique and the role of pathology in directing management.
- Recognize and differentiate common rashes from those which can be life threatening, and determine when referral is indicated.
- Recognize and appropriately treat common dermatoses.
- Integrate the rationale and use of various topical and systemic therapies including corticosteroids, anti-fungals and antibiotics.
- Integrate skin cancer management skills into clinical practice.
