AI Spy: Artificial Intelligence in Healthcare

Session Date: 03/23/2021

Session Time: 11:00 – 11:45 AM (CST)

Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

Advancements in data storage, data availability, electronic health records, and computer processing has allowed Artificial intelligence (AI) to re-emerge as a promising tool to benefit health care. Using their training and experience, pharmacists can play a key role in developing, evaluating, and implementing AI models in the future of healthcare. This presentation will review the components of AI that is necessary for pharmacists to engage with data scientists and clinicians to develop and evaluate test models for patient care.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Outline core concepts of artificial intelligence (AI)
2. Explain components of AI model development and validation
3. Identify criteria to evaluate clinical utility of AI solutions
