You Take My Breath Away: Controversies in RSI

Session Date: 04/13/2021

Session Time: 11:00 – 11:45 AM (CST)

Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

Pharmacists practicing in acute care settings are commonly involved in medication dosing and selection for patients undergoing rapid sequence intubation (RSI). There is an abundance of literature surrounding pre-medication, induction and paralytic dosing and choice for these patients. This talk will review this literature, specifically focusing on historical teachings that have been proven incorrect and newer teachings that have become popular in practice.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Describe the goals of pharmacotherapy in RSI
2. Discuss literature surrounding medication choice and dose for RSI
3. Select an appropriate induction and paralytic medication for a patient requiring RSI
