Pop Pop. Fizz Fizz. Oh What a Relief It Is. New CPIC Proton Pump Inhibitor Guidelines

Session Date: 04/20/2021

Session Time: 11:00 – 11:45 AM (CST)

Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

In August 2020, the Clinical Pharmacogenetic Implementation Consortium (CPIC) published new dosing guidelines for proton pump inhibitors (PPI) and *CYP2C19* variants. Previously the Dutch Pharmacogenomic Working Group (DPWG) was the only organization to provide robust recommendations. This presentation will review the differences between these two guidelines and examine the evidence supporting the dosing recommendations published by CPIC.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Define actionable proton pump inhibitor (PPI) drug-gene associations
2. Discuss current pharmacogenomic PPI guidelines, including the 2018 Dutch Pharmacogenomic Working Group (DPWG) and 2020 Clinical Pharmacogenetic Implementation Consortium (CPIC)
3. Review primary literature depicting *CYP2C19* guided PPI dosing
