### Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including: pharmacists, RNs, APRNs, PAs, MDs.

### Activity Overview

Since the emergence of SARS-CoV-2 pandemic, the practice of pharmacy has been altered to some degree in most, if not all, facets and pharmacists have been engaged in many aspects of the pandemic response. A panel consisting of pharmacists from a wide range of practice specialties will answer audience questions regarding their experiences in the COVID-19 response including treatment algorithm development, investigational drugs, healthcare incident command response, and patient care in the emergency department, critical care, and pediatric settings.

### Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Describe how pharmacists can be involved in healthcare incident command response to a pandemic
2. Identify medications currently being used and investigated in the treatment of COVID-19 disease
3. Discuss pharmacotherapy treatment considerations in critically ill patients with COVID-19 disease
