## COURSE HIGHLIGHTS

- Reviews clinically important information regarding the management of cardiac and vascular diseases affecting patients with cancer and cancer survivors.
- Interactive, practice-based format includes case presentations and state-of-the-art lectures in recent and topical developments in this emerging field.
- Goal is to improve quality, safety and outcomes for patients within the dynamic and interactive educational experience.
- Current state of knowledge of common cardiovascular complications, such as heart failure (HF), myocardial ischemia, hypertension (HTN), thromboembolism, arrhythmia associated with frequently used anticancer medications.
- Complex patient care and clinical decision making using a case based approach.
- Optional Echocardiography Workshop

## TARGET AUDIENCE

This course is designed for clinical cardiologists, heart failure specialists, oncologists, hematologists, internal medicine specialists, nurse practitioners, physician assistants, and allied health personnel working in cardiology or hematology-oncology areas.

## LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

- Describe pharmacotherapy and device therapy and advanced therapies in the management of patients with cardiotoxicity.
- Identify diagnostic, clinical, and management options in the care of cardiovascular patients with cancer.
- Use a case based approach to understand, treat and manage complex cancer patients with cardiovascular disease.

Hands-on Workshop Objective:

- Identify the practicalities of accurate and valid measurement of cardiac chambers and novel echocardiographic measures for early detection of cardiotoxicity using strain imaging.
