MAYO CLINIC'S CURRENT CONCEPTS IN THE MANAGEMENT OF THE ADULT ECMO PATIENT

OCTOBER 27-28, 2017

Mayo Clinic J. Wayne and Delores Barr Weaver Simulation Center Jacksonville, Florida

COURSE DIRECTORS

José L. Díaz-Gómez, M.D. Pramod K. Guru, M.B.B.S. Robert A. Ratzlaff, D.O. Gregory J. Schears, M.D.

Registration and additional course information can be found on our course website: ce.mayo.edu/node/26100

Course Highlights

This course takes advantage of modern educational concepts to provide clinically relevant material through realistic scenarios and simulation on ECMO initiation, management and removal. This highly interactive approach puts the learner in the position of the clinician needing to make simple thorough complex decisions commonly faced when providing ECMO. There will be limited traditional didactic presentations and a greater emphasis on interactive learning in small groups using accelerated scenarios around specific topics. Hands-on simulation will be used to expose the learner to a range of typical management issues and ECMO emergencies. For both novice and experienced ECMO care givers, the course will provide an exceptional learning environment for solid ECLS concepts and energize ECMO providers to offer state-of-the-art lifesaving opportunities for critically ill patients.

Topics Include:

- Selection
- Device Transition-Transplantation
- Coagulation Management, Hemostasis
- Heart Failure
- Going On
- ECPR
- Circuit Emergencies
- Circuit Problem Solving
- Respiratory Failure

- Cannulation
- End of Life & Ethical Issues
- Starting a Program
- Clinical Problem Solving
- Trial Off (with ECHO assessment)
- ECMO Removal
- Transportation & Misc.

Course Learning Objectives

Upon conclusion of this program, participants should be able to:

- Identify patient populations that may benefit from ECMO (including eCPR)
- Formulate which ECMO cannulation strategy will achieve optimal success
- Describe anticoagulation, transfusion and fluid management during ECMO
- Summarize strategies to treat pain, agitation and delirium during ECMO
- Describe use of echocardiography in hemodynamic assessment of ECMO patients
- Predict ethical dilemmas during the care of ECMO patients
