Doctor Farmer established several foundational international critical care programs. He is a founder of the United States Department of Defense Critical Care Aeromedical Transport Team (CCATT) program, now the largest critical care transport system in the world. He was founding Editor-in-Chief, Multidisciplinary Critical Care Knowledge Assessment Program (MCCKAP), the in-training examination administered to critical care fellows in the US and Canada. He was also an initial program developer and textbook editor, Fundamental Critical Care Support (FCCS). This SCCM course exists globally with a companion textbook in numerous languages; more than 200,000 students have completed the FCCS course since its inception. Doctor Farmer served as founder and textbook editor for the SCCM Fundamental Disaster Management (FDM) programs. These global educational programs for disaster medical training are taught worldwide and similarly offer multiple language options. He has additionally written and edited several books on disaster medicine published by The Joint Commission and the Society of Critical Care Medicine.

Doctor Farmer has received numerous awards for teaching excellence from Mayo Clinic College of Medicine, including a Lifetime Achievement Education Award from the Critical Care Fellowship training programs. In 2006 he was named Distinguished Alumnus, McGovern Medical School, The University of Texas. He received the Distinguished Service Award from the Society of Critical Care Medicine. He received a Lifetime Achievement Award, International Pan-Arab Critical Care Medicine Society. As a nationally and internationally recognized innovator and leader in medicine, Doctor Farmer was formally acknowledged and received the Air Force Association (AFA) Paul W. Myers Outstanding Physician Award, US Air Force, and the Zachary Fisher Chairman of the Joint Chiefs of Staff Award, Department of Defense, both for his work developing the CCATT program.
