## Review, Workshops and Controversies 2021

This course is designed for medical providers who care for patients with neurological emergencies, acute stroke and brain hemorrhage, acute brain injury, coma, and disorders that require hospital, Emergency Department and Intensive Care Unit (ICU) evaluation. It will provide a mixture of didactic, case-based and evidence based guideline review, as well as hands on workshops.

These hands on workshops include central line placement; intracranial ICP monitor and ventriculostomy placement; hypothermia and targeted temperature management (TTM), mechanical ventilation and multimodal monitoring workshops.
