

Multidisciplinary Update in Breast Disease – Online CME

Activity Description

This online continuing medical education course will provide a multidisciplinary update in prevention, evaluation, diagnosis, management, and treatment of benign and malignant breast diseases, high risk and survivorship issues. The course has multidisciplinary experts in their field presenting the latest, diagnostic, treatment and management options. Highlights include: Genetics and High Risk Management, Breast Imaging Modalities and Supplemental Screening Options for Dense Breasts, Updates in Surgical Management and Local Treatment of Breast Cancer, Radiation Therapy Options, Advances in Oncology, Updates in Breast Reconstruction & Advanced Surgical Techniques, Resilience and the Health Care Provider, Fertility Preservation Options, and Tele-oncology and Breast Cancer.

Target Audience

This online course is designed for primary care providers, advanced practice providers, nurse practitioners, oncologists, radiologists, surgeons, pathologists, and gynecologists who provide both diagnostic and treatment of patients with breast cancer.

Learning Objectives

Upon conclusion of this activity, participants should be able to:

- Recognize management options of the high-risk patient including risk assessment, preventive therapy and role of hormone therapy.
- Recognize new supplemental imaging studies and role of breast MRI in screening and diagnosis of breast cancer.
- Summarize contemporary axillary management strategies and their risks.
- Recommend surgical, radiation, and medical oncology management and treatment options for newly diagnosed breast cancer patients.
- Describe surgical management options in hereditary breast and ovarian cancer syndromes.
- Summarize who should have genetic testing.
- Summarize new clinical trials and advances in chemotherapy agents for breast cancer patients.
- Recognize current controversies in the management of DCIS.
- Summarize advances in the management of inflammatory breast cancer.
- Recall fertility preservation options.
- Recall what's new in tele-oncology and breast cancer.
