

Thursday, October 14, 2021
Hematology/Oncology Workshop

Upon completion of this session, participants should be able to:

- Identify, diagnose and treat common hematological and oncological emergencies based on the most recent practice guidelines and standards of care.
- Develop strategies to overcoming barriers in cancer care and symptom management.
- Discuss uses of cancer therapies including immunotherapy and radiation by improving awareness of associated toxicities and best practices to manage.

Thursday, October 14, 2021
