

## Course Description

A lecture and laboratory course intended for Otolaryngology/Head and Neck Surgeons, Oral Maxillofacial Surgeons, and residents and fellows designed to teach comprehensive medical and surgical management of salivary gland disorders. This three day hands on course features renowned international faculty and Mayo Clinic faculty, and will focus on surgical management of benign and malignant salivary gland tumors, reconstruction of salivary gland defects and facial paralysis, management of non-neoplastic salivary disorders, and sialoendoscopy. A hands-on workshop in the Mayo Clinic state of the art anatomy training facility will focus on diagnostic and interventional sialoendoscopy, surgery for major salivary gland tumors, and reconstruction after salivary gland surgery, including management of the paralyzed face.

## Course Learning Objectives

Upon conclusion of this program, participants should be able to:

- Identify the appropriate indications for sialoendoscopy
- Describe how to set up a sialoendoscopy practice in their home institution
- Set up a sialoendoscopy practice in their home institution
- Perform routine sialoendoscopy
- Identify radiographic features of salivary gland malignancies
- Perform total parotidectomy
- Describe how to manage reconstruction of complex facial defects related to parotid surgery, including facial paralysis

Attendance at this Mayo course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.
