COURSE HIGHLIGHTS

Diversity in Biomedical Education

- Define new strategies, initiatives and metrics to advance underrepresented minority (URM) student diversity
- Engage with key leaders, constituents and stakeholders who are involved in defining pathways
- Hear success stories, identify best practices and lessons learned in the quest to increase student diversity access

COURSE DESCRIPTION

This summit is designed to generate a national conversation on current challenges and future solutions to enlarging the pipeline for underrepresented students in medical education. Participants will engage in deconstructing the MD/PhD pathway to identify ways to increase diversity in medicine.

Participants will review and explore evidence that defines the diversity pipeline for physicians and physician scientists. In addition, individuals and groups will be asked to share best practices for advancing diversity in the medical education pipeline, as well as showcasing novel strategies that aim to prepare underrepresented students to pursue these careers.

TARGET AUDIENCE

Physicians and physician-scientists, high school STEM education faculty and administrators, medical education leaders, funders, medical education policy makers, and community pathway organizations, as well as medical students who have an interest in promoting diversity.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

- Review evidence that defines the diversity pipeline for physicians and physician scientists
- Identify and share best practices for expanding the medical education pipeline
- Explain novel strategies that will encourage students to pursue these careers
- Identify the challenges and potential solutions necessary to enhance access to pathways that will increase diversity in medicine
- Collaborate with a national consortium to further diversity in the medical education pipeline
