CLINICAL TRIALS

Research is an integral part of Mayo Clinic. Our physicians are actively engaged in a wide variety of novel clinical research, offering patients promising experimental agents and devices. Mayo Clinic investigators work together with the referring physician to optimize patient care. clinicaltrials.mayo.edu

A Collaborative Approach to Pancreatic Cancer

Mayo Clinic's multidisciplinary pancreas program provides comprehensive, patient-centered care for pancreatic cancer and premalignant conditions such as IPMN and cysts. Our core specialists - surgeons, gastroenterologists, and medical and radiation oncologists - offer a depth of diagnostic and clinical expertise, and advanced treatment options. We look forward to partnering with you on your patient's care. For detailed information, visit mayoclinic.org.

About Our Program

- Close collaboration with community physicians for second opinions, referrals of complex cases and communication about referred patients.
- Rapid evaluation, diagnosis and treatment planning facilitated by dedicated intake coordinators.
- Specialized expertise in EUS and advanced endoscopy to provide conclusive diagnosis and management of pancreatic problems.
- Multidisciplinary clinics for pancreas and hepatobiliary cancers, more specialists, more clinical activity, more research.
- Stereotactic body radiotherapy and proton beam therapy for select cases.
- A comprehensive clinical trial program that encompasses all stages of pancreas cancer.
- Access to some of the most promising innovative molecular and immune targeted therapies through our extensive clinical trials program across all phases of study.
- Genomic profiling protocol for select cases.
- Mayo Clinic Hospital ranked No. 1 in Arizona per U.S. News & World Report.
- GI/GI Surgery ranked No. 1 in Arizona (No. 7 nationally).
