

Welcome to this CME course on Shared Decision Making for Cardiovascular Risk Reduction. The course consists of two videos and a brief assessment. You should complete the course components in the following order:

First, watch ***Use of Shared Decision Making to Individualize CV Prevention Strategies***, this 25.25 minute video from Dr. Victor Montori. It provides a background on the science and principles of shared decision making, including descriptions of the evidence supporting shared decision-making tools and interventions.

Second, watch **Heart Health – Shared Decision Making Tool Re: CV Prevention**, this 6.16 minute video demonstrating the capabilities of the Cardiovascular Prevention Choice Decision Aid. This tool is currently available from within your EHR, where it is programmed to auto-populate patient variables.

Finally, please complete this short assessment of the course. In so doing, you attest to your completion.
