## Total Heel Off-loading with Natural Warming for Ultimate Patient Care

### Indications for Use:

- PATIENTS ON VASOPRESSORS
- ECMO / IABP
- POST BKA CONTRALATERAL FOOT
- POST-OP OPEN & ENDO CLI REVASCULARIZATION
- ARTERIAL THROMBOLYTICS

The **Rooke Vascular Boot** has been used by surgeons, interventionalists, and wound care specialists for close to 35 years. This healing boot is built to provide total heel off-loading and redistribution of pressure along the calf to help treat and prevent lower-extremity skin breakdown.

### Prevention of:

- HEEL ULCERS
- FOOT DROP (especially for patients immobile for 3+ days)

### Patients who are:

- UNCONSCIOUS / COMATOSE
- VENT DEPENDENT

### Key Features:

- TOTAL OFF-LOADING OF THE HEEL
- COMFORT+ LAYER
- FOOT DROP PREVENTION
- IMPACT PROTECTION WITH PADDED TOE BOX

### Patients who have:

- COLD MOTTLED FOOT / NON-BLANCHABLE HEELS AND TOES
- DIABETIC NEUROPATHY
- EXISTING PRESSURE ULCERS
- LOWER EXTREMITY ISCHEMIC WOUNDS / PVD
- SPINAL CORD INJURY
- THERAPEUTIC HYPOTHERMIA

**Product #HFS-102: | \$110**

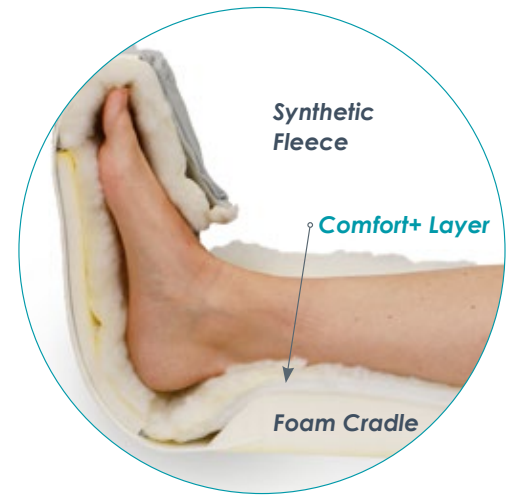

### Includes:

- **One Boot**
- **One Anti-Rotation Wedge**
- **One Pair of Foot Drop Prevention Wings**

*Please review the Rooke Vascular Boot Case Study Highlights on the next page.*

# Rooke® | VASCULAR BOOT CLINICAL STUDY HIGHLIGHTS

- Wearing Rooke Vascular Boots demonstrated a 5.3 mm/Hg increase in TCPO2. *Rooke Thom, et al., Mayo Clinic, Angiology Vol. 381 No. 51 406, 1987*
- Rooke Boots demonstrated a 40%+ increase in regional foot perfusion using ICGA on pts. with compromised arterial inflow. The Rooke BKA Protector & Rooke Mitt also showed similar results. *Charles A. Anderson, MD, FACS, FAPWCA, et al., Wounds Vol. 30, no. 20, 2018*
- Rooke Boots were highly successful in the ICU at prevention and treatment of pressure ulcers in the lower extremity & promotion of the healing of existing arterial wounds. *Riddle Memorial Hospital, Main Line Health - M. DeSales Foster, MSN, CWOCN, CRNP*
- Diabetic pts. with chronic, non-healing neuropathic ulcers showed a 50%+ increase in blood flow measured by duplex (flow ml/min) at the dorsum of the foot by wearing Rooke Boots. *Elon University White Paper - Daryl Lawson, PT, MPT, DSc, Associate Professor, Department of Physical Therapy, Elon University, September 2015.*

*Our patented Rooke Boot design offers complete heel offloading while naturally warming the entire limb*

## Rooke® | VASCULAR MITT

### First Choice for Natural Hand Warming

*Used by Vascular Medicine Specialists for over 20 Years*

#### Indications for Use:

- RAYNAUD'S SYNDROME
- AV ACCESS STEAL (MILD TO MODERATE)
- HAND & FINGER ISCHEMIA
- BUERGER'S DISEASE
- SCLERODERMA
- DIGIT REATTACHMENT

**Product #RV-51 | \$68**

#### Key Features:

- SYNTHETIC FLEECE FOR NATURAL WARMING
- THUMBLESS FOR THOROUGH DIGIT WARMING
- GRIP MATERIAL FOR LIMITED HAND USE

*Latex-free, one size fits all*
