

JUZO **ULCER** PRO

Compression Stocking + Liner

Ulcer Liner
PLUS
Compression
Stocking

The Juzo UlcerPro is a two layered system that can be applied over top of wound dressings, while providing therapeutic compression.

Starts at the ankles & gradually decreases as it rises up the leg; improves circulation to keep legs healthy & on the move.

Supports movement to encourage physical activity – a key factor to living healthy & managing ulcers.

Dual stretch zones:
High elasticity in the foot & ankle for a fit without binding.
Short stretch in the leg for greater ease in donning.
Machine wash & dry.

A dual-layer system that includes a pair of open-toe, knee-high compression stockings & two mild compression liners.
