Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including: pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

Since its establishment in 1992, the 340B program has been affording hospitals and clinics throughout the country with price discounts to expand access of care to the most vulnerable patients. Challenged by operational and regulatory requirements, the 340B program has recently come under scrutiny. In addition to a review of current state, we will also explore recent concerns raised with regard to this program and consider what the potential consequences might be if significant changes were to occur.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Identify the purpose of 340B and the impact on health care costs
2. Evaluate the role of 340B contract pharmacies
3. Review challenges facing the 340B program and potential consequences
