

## **Tim Suther, Senior Vice President & General Manager, Data Solutions, Change Healthcare**

At Change Healthcare, Tim focuses on inspiring a better healthcare system through the effective & responsible use of data & analytics, by creating & applying best practices from within and outside of healthcare.

He champions Change Healthcare's programs supporting academic medical research to understand disease progression, intervention effectiveness, and overall health outcomes. These programs support numerous studies on the role of social, physical and behavioral determinants as well as race, ethnicity and language preference on health & wellness. Under his leadership, Change Healthcare has developed patent-pending tools that persistently & automatically monitor analytic projects for adherence to leading privacy, ethical use & data governance guidelines, helping leading data scientists innovate with confidence.

His career spans over three decades maximizing commercial & societal value through data, analytics & technology transformation, with many of these transformations now being applied in healthcare. Previous roles included founder & entrepreneur (Suther Strategic LLC), Managing Director (JPMorgan Chase), Chief Marketing & Strategy Officer (Acxiom), Senior Vice President (Metavante), President (Protagona Worldwide) and a variety of roles at Unisys.
