

# Mayo Clinic Wound Care Symposium: Vascular and Diabetic Wounds Online CME Course

## Activity Description

This course is designed to provide the latest diagnostic and treatment strategies for comprehensive wound management. The program is multidisciplinary with faculty representing various wound-related fields. Multiple educational formats will be used, including interactive workshops, hands-on demonstrations, didactic sessions, and case presentations that offer comprehensive wound-management strategies (from basics to high-level). The conference will meet the continuing education needs of a range of wound care providers, from novices to experts.

## Target Audience

This activity is appropriate for physicians, certified nurse practitioners, physician assistants, registered nurses, podiatrists, physical therapists, dietitians, and others who care for wound care patients.

## Learning Objectives

Upon conclusion of this activity, participants should be able to:

- Identify the principles underlying the care of chronic wounds
- Describe systemic factors that may impair healing
- Describe specific diagnostic tests related to wound assessment
- Identify patients at risk for developing pressure ulcer
- Discuss offloading and management of neuropathic wounds
- Describe interventions which can contribute to healing or prevention of venous wounds
- Discuss surgical revascularization and debridement

Attendance at this Mayo Clinic course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.
