Financial assistance is available for eligible patients\*

YourBlueprint can connect eligible patients with financial assistance options to help them access their therapy.

## **Co-Pay Assistance Program**

This program helps eligible, commercially insured patients pay as little as \$0 for their prescription.

## **Patient Assistance Program (PAP)**

This program helps eligible patients who lack insurance coverage or are ineligible for the Co-Pay Assistance Program receive therapy at no cost.

## An array of options for your patients

YourBlueprint™ offers the following no cost options to patients who need assistance accessing their therapy:

### QuickStart

Provides a 15-day supply of therapy in the event of a coverage-related delay

### Coverage Interruption

Provides short-term supplies of therapy to patients who are experiencing a lapse in coverage

### Dose Exchange

This program allows patients taking AYVAKIT™ (avapritinib) to trade in their remaining medication for a new dosage in the event of a dose adjustment.

## Getting started

It can be difficult to predict if your patients will encounter coverage delays or situations that require financial assistance. By initiating the YourBlueprint enrollment process as early as possible, you can help your patients receive the support they need, when they need it. Help your patients avoid therapy delays by completing an enrollment form or calling YourBlueprint to speak with a Case Manager.

### Two simple ways to get started
