

The top half of the image features a dark blue background. In the upper left, the KLSmartin GROUP logo is displayed, with 'KLS' in red and 'martin' in white, and 'GROUP' in smaller white letters below. To the right of the logo, a medical headlight device is shown. It is a black, cylindrical device mounted on a bracket, which is attached to a larger black component with a grid of small holes. The headlight is angled downwards and to the right, casting a bright, white beam of light that illuminates the dark blue background.

Concentrate on the brightly lit surgical field with total freedom and complete comfort.

MedLED Chrome® Headlights

Freedom without Sacrifice

The MedLED Chrome® headlight has incorporated the best that technology offers to accomplish the once impossible: a silent, comfortable, and cordless headlight that can light up any field in the O.R. in terms of both intensity and spot size.

Features

- Luminous intensity:
 - MC3 – 100,000 lux
 - MC6 – 200,000 lux
 - MC7 PRO – 275,000 lux
 - MC7 X21 – 325,000 lux
- Battery service life (infinite with 4-bay charger):
 - MC3 – 7.75 hr
 - MC6 – 6.75 hr
 - MC7 PRO & MC7 X21 – 3.50 hr
- USB charging time: 6.5 hours
- 4-Bay charging time: 10 hours; charge up to two sets at a time
- Adjustability: full beam angle adjustability, left-to-right swivel, increased spot size range
- Spot quality: crisp, circular beam of homogenous light

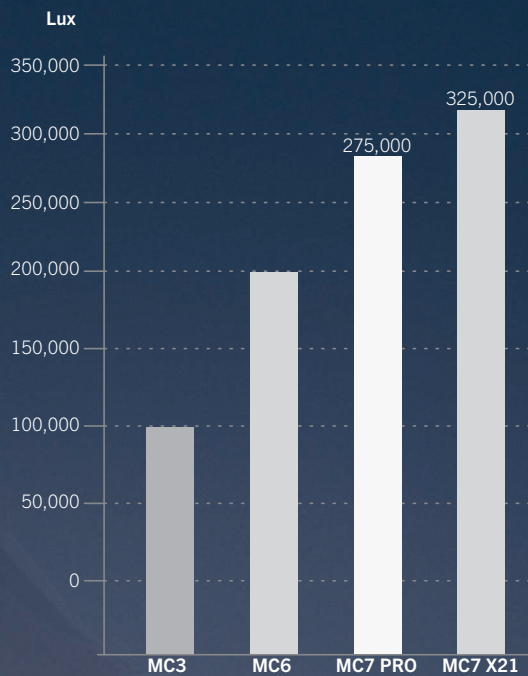

MedLED Chrome®

Freedom without Sacrifice

If you have a need for a powerful, long lasting, comfortable headlight with no cord, KLS Martin has you covered with a full range of headlights and accessories.

MedLED Chrome®

Head-Mounted Circuit Technology

Lose the optical cables and belt pack cords and go cordless without sacrificing basic operating light needs.

Does not interfere with sterility. Without cables or battery belt packs, it's kept safely above the neck.

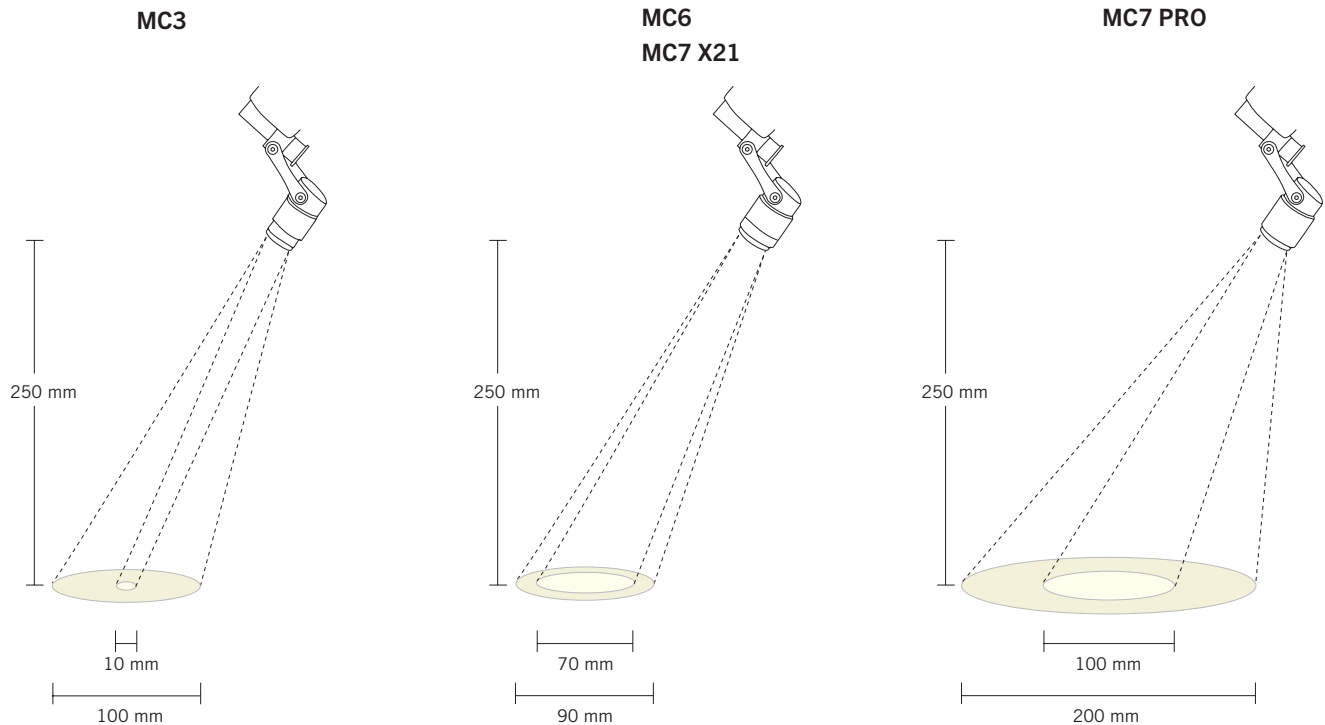

Quiet-Cool™ Heatsink Technology

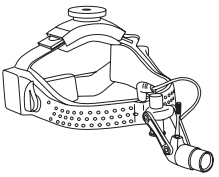

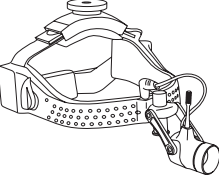

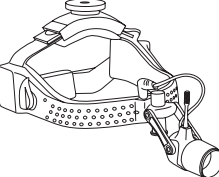

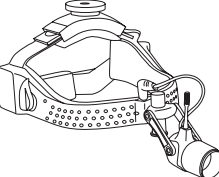

Cool and quiet

Proprietary technology is used to cool the LED instantly, avoiding the potential for unnecessary heat buildup. We also designed the housing itself to manage any remaining thermal dissipation.

Fans demand more power, requiring large batteries attached to the waist of the user. As a moving part in constant operation, the fan motor has a high potential for malfunction.
