Radiology Workshop

8:00 a.m. – 12:00 p.m.

15-minute break at 10:00 a.m.

Learning Outcome: The Radiology Workshop is designed for providers interested in learning or reviewing content specific to x-rays, CTs, and interventional radiology. The course will include review and practice of anatomy, common pathology, and case scenarios for each of the imaging modalities.

Learning Objectives: Upon conclusion of this program, participants should be able to:

Objectives for chest, abdomen, pelvis, and extremity imaging:

- Review normal anatomy of x-rays and computed tomography (CT)
- Develop a systematic approach to review your own images
- Recognize common pathology on x-ray and CT

Discuss common interventional and palliative procedures.

- Central Access
- Enteral Access
- Nephrostomy Tubes
- Drain Placement
- IVC Filters Placement/Removal
- Procedures to Palliate Malignant Pain
