COURSE DESCRIPTION

This symposium provides a unique platform during which subspecialty experts in pediatric brain tumors can share information. Robust interactive sessions allow participants to discuss current concepts, challenges, and ongoing research in the multimodal treatment of childhood brain tumors.

TARGET AUDIENCE

This course is designed for physicians, scientists/researchers, nurse practitioners, physician assistants, psychologists, pharmacists, and students/residents with an interest in pediatric neuro-oncology.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

- Describe the newer biological insights in various pediatric brain tumors and their translational relevance
- List the various advances in the methods used to enhance drug delivery into the brain tumors
- Describe advancements in neuroimaging, including the evolving role of radiomics/radiogenomics and other modalities of artificial intelligence in pediatric brain tumors
- List newer methods in radiation oncology and their effects on diminishing late effects in children with brain tumors to de-escalate cancer care in low-risk patients

COURSE DIRECTOR

Soumen Khatua, M.B.B.S., M.D.

MEETING LOCATION

Leighton Auditorium, Siebens Building
Mayo Clinic in Rochester, Minnesota

ACCOMMODATIONS
