Parkinson’s Disease and Other Movement Disorders – 2022

November 4-5, 2022

MAKE PLANS TO ATTEND
ASU Health Futures Center
Phoenix, Arizona, US

The emphasis of this course is fundamental diagnosis and treatment of issues that commonly confront the clinician.

ce.mayo.edu/parkinsons2022
HIGHLIGHTS

• This two half-day comprehensive course on Parkinson’s disease and all movement disorders provides a review for neurologists, primary care physicians, and other allied healthcare professionals who evaluate movement disorder patients

• The emphasis of this intermediate level program is fundamental diagnosis and treatment of issues that commonly confront the clinician

• The course focus includes standard of care treatment algorithms for management of movement disorders and video demonstrations to assist with movement diagnosis

• The hybrid format (live and livestream) offers case-based presentations, interactive voting, and Q & A sessions with faculty.

LEARNING OBJECTIVES

Upon conclusion of this program, participants should be able to:

• Differentiate between the most common hyperkinetic and hypokinetic movement disorders

• Compare and contrast Parkinson’s disease (PD) from Atypical Parkinsonian syndromes

• Review therapies for management of motor and nonmotor symptoms of Parkinson’s Disease

• Assess first-line pharmacologic options for the most common movement disorders

• Compare the indications for botulinum toxin therapy of movement disorders

• Describe the indications for surgical interventions in Parkinson’s Disease, including deep brain stimulation and pump therapies

• Describe the impact of COVID-19 on Parkinson’s disease
