## Mayo Clinic Wound Symposium: The Edges of Wound Care Online

<table>
<thead>
<tr>
<th>Duration</th>
<th>Lecture Title and Speakers</th>
</tr>
</thead>
</table>
| 0:41:09        | Common and Unusual Causes of Ulcers  
*Keynote speaker - Tania Phillips M.D., Boston University School of Medicine*                                                                                   |
| 0:11:08        | Cellular Senescence and Wound Healing  
*Saranya P. Wyles, M.D., Ph.D.*                                                                                                                                    |
| 0:20:49        | Biomanufacturing in Regenerative Medicine  
*Julie G. Allickson, Ph.D.*                                                                                                                                          |
| 0:25:17        | Application of Exosome Based Therapy in Regenerative Medicine  
*Atta Behfar, M.D., Ph.D.*                                                                                                                                 |
| 0:25:09        | Diagnosis and Treatment of Atypical Wounds  
*Mark Denis P. Davis, M.D.*                                                                                                                                 |
| 0:35:22        | Guess That Wound: A-Z  
*Brianna M. Skrukrud, APRN, C.N.P.*                                                                                                                                   |
| 0:23:01        | Phage Therapy: A Novel Therapy for Musculoskeletal Infections  
*Gina A. Suh, M.D.*                                                                                                                                                   |
| 0:19:52        | Diabetic Foot Ulcers: The Vascular Perspective  
*Keith E. Swanson, M.D.*                                                                                                                                              |
| 0:27:38        | Osteomyelitis/Diabetic Foot Infection: The Orthopedic Perspective  
*Daniel B. Ryssman, M.D.*                                                                                                                                          |
| 0:26:10        | Imaging of the Diabetic Foot  
*Matthew A. Frick, M.D.*                                                                                                                                              |
| 0:27:21        | ReIMAGining Wound Care: The Next Frontier  
*Dominick F. Pahl, M.S., R.N.*                                                                                                                                          |
| 0:19:03        | Ischemic Wounds When to Consult Vascular Surgery  
*Fahad Shuja, M.B.B.S.*                                                                                                                                              |
| 0:23:55        | Limb Salvage: Could We? Should We?  
*Brandon J. Yuan, M.D.*                                                                                                                                               |
| 0:24:54        | When New Ulcers Happen After Amputation: Assessment and Treatment of Residual Limb Wounds  
*Fantley (Clay) C. Smither, M.D.*                                                                                                                                       |
| 0:26:29        | Wound-Related Pain: When Healing Hurts  
*Christine (Christy) L. Hunt, D.O.*                                                                                                                                        |
| 0:25:19        | Pressure Injuries: Prevalence, Prevention, and Management  
*Kelly M. Derby, APRN, CNS*                                                                                                                                              |
| 0:47:38        | Deep Tissue Injuries  
*Joyce Black, Ph.D., R.N., University of Nebraska Medical Center (UNMC)*                                                                                           |
| 7:30:14        |  
*7.50 credit hours*  
*8.00 credit hours with assessment*                                                                                                                                             |
