JAMES R. CERHAN, M.D., Ph.D.

ENTERPRISE DEPUTY DIRECTOR, POPULATION SCIENCE & CANCER CONTROL
MAYO CLINIC COMPREHENSIVE CANCER CENTER

CERHAN.JAMES@MAYO.EDU

James R. Cerhan, M.D., Ph.D. is a Professor of Epidemiology and the Ralph S. and Beverly Caulkins Professor of Cancer Research in the Department of Quantitative Sciences at the Mayo Clinic in Rochester, Minnesota. He serves as the Enterprise Deputy Director, Population Science and Cancer Control in the Mayo Clinic Comprehensive Cancer Center and as a Co-Director of the Mayo Clinic Biorepositories Program.

Dr. Cerhan's research uses epidemiologic approaches to study the causes and outcomes of cancer in human populations. His major contributions have been on identifying genetic, environmental, lifestyle, and biological factors that are responsible for causing lymphoma and improving the outcomes of patients with lymphoma. His program has been continuously funded by the National Institutes of Health (NIH) since 1995, and he has published over 500 papers in the peer-reviewed literature. He currently leads the Lymphoma Epidemiology of Outcomes (LEO) cohort, a NIH-funded cohort study involving eight academic centers. He collaborates extensively, and has served in many leadership roles in the International Lymphoma Epidemiology (InterLymph) Consortium and the National Cancer Institute Cohort Consortium.
