Dr. Janice Krieger (Ph.D., Penn State University) is Professor of Clinical Translational Science at Mayo Clinic, Florida. She is a communication scientist with expertise in developing, implementing, and evaluating culturally tailored interventions that utilize precision messaging techniques to increase cancer health equity. Her research uses principles of communication science to improve translation of basic and clinical

research to address patient, family, and community needs to examine how all individuals receive the right messages at the right time in their patient journey.

Dr. Krieger is PI or contact PI of three large NIH-funded clinical trials that utilize communication theory and technology to improve access to and quality of clinical care, ranging from screening to survivorship. She also serves as Associate Director of Community Outreach and Engagement at Mayo Clinic Comprehensive Cancer Center (MCCCC) Florida and co-leader of the Prevention, Survivorship, and Care Delivery Research Program within the MCCCC.
