

Dan P. Kelleher, Ph.D., M.P.H.

Mayo Clinic Health System

Dr. Dan Kelleher is an Associate Consultant working with the Office of MCHS Research, Kern Center and Department of Pediatric and Adolescent Medicine, and he is an Assistant Professor of Health Services Research. Dr. Kelleher is also a Council Member of the American Nurses Enterprise Research Advisory Council. He conducts health economics and health services research using econometric methods and mixed methods approaches using primary and secondary data. His research portfolio spans nursing work environments, rural and underserved patient healthcare access, patient and provider preferences, health economic evaluations, and patient-reported outcome measures.

He holds a B.Comm (Economics), MSc (Health Economics), and PhD (Health Economics) from the University of Galway in Ireland and an MPH (Health Policy and Administration) from Yale University. He completed a post-doctoral fellowship (Health Economics and Health Services Research) at the Mayo Clinic Kern Center for the Science of Health Care Delivery. Dr. Kelleher provides high-quality research evidence to key decision-makers and hospital leadership. This evidence helps them make informed decisions to deliver the best care to patients while supporting staff and maintaining high-quality work environments.
